

# DOUBLE Difference War

Get a partner. (You can also play in 3's but it's trickier!) ☺

## You will need:

- ten frame cards
- some counters

## How to Play:

- Each partner turns over **two** cards.
- Add up your cards.
- Compare the total number of dots to your partner's total number of dots.
- Who has more?
- HOW MANY more?
- The person with more dots wins that many counters.
  
- Keep playing until the counter pile runs out.
- Count your counters.
- Who has more? More wins!
