

# Doubles Plus 1 Snap!!

## Play in pairs

You will need:

- ten frame cards
- some counters
- a hundred's chart

## How to Play:

- Put all your ten frame cards in a pile between you.
- Player 1 turns over the top card.
- Both players think... "What is the **double + 1** for that number?"
- *If the number is 7, then think*
  - "7 doubled is 14. Add one. That's 15."
- The first player to say the double plus 1 fact wins the card.
- The other partner puts a counter on the hundreds chart to show the doubles fact.
  
- Keep playing until the cards run out.
- What numbers did you cover up? What patterns do you see?
